

The 2010 FIA Conference: Entering a New Decade of Fire Safety

In association with Henderson's Insurance

25th March, Northampton

The FIA's annual conference, in association with Henderson's Insurance, brings together both members and non-members from the fire industry, providing them with a forum to discuss all the latest key issues and topics affecting the fire safety community.

As we enter a new decade, the 2010 conference offers all delegates the opportunity to hear about the FIA's plans for the coming year as well as gain a valuable insight from our guest speaker Les Byrom, Chairman for the Business & Community Safety Forum. The format of the day then moves into a series of half hour presentations across two rooms, allowing delegates to choose which seminar sessions are most relevant to them, before finishing up with an open networking session.

The venue for this year's conference is the base for The Blades aerobatic team at Sywell Aerodrome near Northampton. The Blades is the world's only globally-accredited aerobatic airline and its pilots are all either ex-RAF or Red Arrows. Not only are the Blades hosting the day, they will also be wowing delegates with a 15 minute display during lunch!

Since their debut public display at the Beckhams' pre-World Cup party in 2006, The Blades have performed at some of the most prestigious events in the world. They have flown over 300 displays at events from the Cannes International Advertising Festival and the Bahrain F1 Grand Prix to Cowes Week and T4 'On The Beach'. And attendees of the 2010 FIA Conference will be lucky enough to see the team practicing some of their new display moves during the lunch hour. For more information on The Blades go to www.theblades.biz.

The combination of technical content, unique venue and lunchtime entertainment makes this the not-to-be-missed event of the year!
